US Trademark Application Worksheet

ISOCLINE — Standard Character Mark, Class 9, §1(b)

Prepared for Starla Cortes

October 2026

Draft only — not legal advice. Have a trademark attorney review before filing; the project's own market-positioning paper requires a clearance search in class 9 before anything is printed or filed.

1 Scope of this application

Mark	`ISOCLINE` (standard character / word mark, no logo or stylization)
Classes	9 only (downloadable software)
Basis	§1(b) — bona fide intention to use in commerce (not yet used)
Filing	TEAS Plus (cheapest path; this application qualifies)

2 Do these before filing (in order)

1. **Form the Ohio LLC.** The applicant must be the entity that owns and will use the mark. You cannot file in the name of an LLC that does not exist yet. Ohio SOS filing is ~$99, same-day online.
2. **Get the LLC's EIN** from the IRS (free, online, instant). Not needed on the trademark form itself, but the entity must be real and correctly named.
3. **Decide the LLC's exact registered name.** This exact string goes in the "Owner of Mark" field. Do not guess or abbreviate. Example choices and how they interact with the mark:
   - `Isocline Labs LLC` — cleanest brand-to-entity match.
   - `Isocline Research LLC` — matches the paper's research-arm idea, but reads more nonprofit-adjacent than a subscription app.
   - A neutral name (`Cortes Software LLC`) also works; the entity name does not have to contain the mark.
4. **Have a trademark attorney run a real clearance search** in class 9 (and ideally 42/44 as a courtesy) before filing. The Justia-only screen in `market-positioning-paper` found nothing in class 9, but it is explicitly *not* clearance.

3 Mark information

Field	Entry
Mark text	`ISOCLINE`
Mark drawing type	Standard character mark
Design/logo	None
Transliteration	None (mark is already Latin characters)
Translation / meaning	"A curve along which a quantity (or slope) holds constant." Do **not** claim a foreign meaning — it is an English technical term.
Disclaimer	None

A standard-character registration protects the name in any typeface, style, or color. Do not file a logo version in this same application; a logo mark is a separate filing. Keep this one clean.

4 Owner of mark (applicant)

Field	Entry
Name	`Isocline Labs LLC` (exact Ohio registered name)
Entity type	Limited Liability Company
State of organization	Ohio
Country of organization	United States
Citizenship statement	"The applicant is a limited liability company organized under the laws of Ohio."

5 Goods and services — Class 9

TEAS Plus requires the identification to track the USPTO ID Manual. Use this wording — functional, non-medical, and on the correct side of the device-vs-model claim boundary:

> **Class 9:** Downloadable computer application software for mobile devices and tablet computers, namely, software for tracking hormone replacement therapy injections and dosing schedules, generating medication reminders, and modeling predicted hormone levels over time.

Alternate, more conservative ID (minimizes examiner pushback on "hormone replacement therapy"):

> **Class 9:** Downloadable software in the nature of a mobile application for tracking medication injections, scheduling medication reminders, and generating predictions of medication levels over time.

What this application does **not** cover (do not add here):

- **Class 42** — hosted/cloud software services (SaaS), data analytics. Add only if you later ship a web service or data offering.
- **Class 44** — medical/health services. A self-tracking app is *not* a medical service; adding class 44 now would be rejected or invite an "inaccurate identification" objection.

6 Filing basis — §1(b)

- **Basis:** bona fide intention to use the mark in commerce on or in connection with the identified goods.

- **No specimen required now.** A specimen (App Store listing screenshot showing the name plus a download/purchase flow) is filed with the Statement of Use.
- **Deadlines:** after the Notice of Allowance you have **6 months** to file a Statement of Use or an extension request (§1(d)). Extensions run in 6-month increments up to ~3 years (five extension requests). Each extension carries a filing fee.

7 Correspondence and attorney

Field	Entry
Attorney	Leave blank if filing *pro se* (yourself)
Correspondence email	The LLC's email — all USPTO mail goes here
Authorized to communicate	Yes (check the box permitting USPTO to email)

8 Fees (verify current amounts at uspto.gov)

Item	Approximate
TEAS Plus application, one class	~$350/class
TEAS Standard application, one class	~$450/class
Statement of Use / extension, per class	~$125/class

TEAS Plus is the right choice: standard character mark, ID-Manual-compatible goods, no specimen yet — all Plus requirements are met.

9 Post-filing timeline

1. **2–4 weeks:** serial number assigned; formality review.
2. **8–12 months:** substantive examination; expect a possible Office Action asking to refine the goods description.
3. **Publication:** mark published for opposition (~30 days).
4. **Notice of Allowance:** the 6-month statement-of-use clock starts.
5. **Statement of Use + specimen** once the app is live under the name.
6. **Registration** (~1 year after filing, give or take).

10 Open decisions

☐ Exact Ohio LLC registered name (goes verbatim into "Owner of Mark") — resolved: `Isocline Labs LLC`.

☐ Goods description: specific ("hormone replacement therapy") vs. general ("medication injections") wording.

☐ Attorney review of the class 9 clearance before filing.
